## What You Don't Know Can Hurt You: Managing Technology Risk

Cybersecurity threats continue to increase and yet the most often overlooked risk in community banks is technological. If not properly managed, this risk may lead to disruptions in your bank, regulatory criticisms and financial losses to your institution. Hear from a former regulator about the importance of a strong technology risk management program which will help to ensure that your bank is properly protected in this dynamic risk environment.

**Sara Nielsen** is senior vice president of technology and compliance at BankOnIT. She came to BankOnIT after serving 13 years at the Federal Reserve Bank of Kansas City as a manager in the Financial Institution Examinations and Inspections Department. Prior to her career at the Fed, Nielsen served in executive management with a large community bank. Nielsen's experience as a former banker and bank regulator provides her with a unique perspective and expertise to advise bankers on changing technology, increasing cyber threats and regulators expectations for compliance.
