

Administering Construction Loans

October 10, 2018
Springfield, IL

October 11, 2018
Lisle, IL

Introduction

Construction loans for both residential and commercial real estate (CRE) remain a major part of commercial-bank lending. Residential construction continues to expand slowly, with remodeling outpacing new homes in some markets. CRE construction projects have seen strong growth in most areas. This program provides an overview of the many issues involved in both residential and commercial construction, as well as key differences between them. The focus is on the issues behind the various procedures in construction.

Many community banks attempt to utilize versions of their residential formats and policies to administer commercial construction loans; however, this generally does not adequately control risk in commercial situations due to several important differences between residential and commercial projects.

Who Should Attend?

Commercial lenders, credit analysts and support staff that deal directly with commercial construction loans; consumer lenders, mortgage bankers, private bankers and support staff involved in residential construction lending; small business lenders, loan review specialists, special assets officers, lending managers and credit officers indirectly involved in the construction lending process can all benefit from this training.

This one-day seminar provides 6 hours of credit toward the prestigious Certified Community Lender designation

About the Presenter

What Others Have Said:

"Richard was very interactive with his audience. Very personable and engaging."

Gina Persiani,
AVP Consumer Lending
Town Center Bank, Frankfort

"I really enjoyed the content and the speaker. He had great past-experience stories."

Jaden Widdersheim, Loan Officer
Shelby County State Bank,
Shelbyville

"Richard was excellent. Not only did he identify potential issues, but he also discussed possible solutions."

Ian Vanderford, Credit Analyst
First National Bank in Staunton

Richard Hamm has been training bankers for 26 years, designing and delivering courses specializing in commercial lending and credit, including portfolio and risk management, commercial real estate (CRE) and appraisals, plus selling and negotiating skills, and director training. His clients include national associations such as The Risk Management Association (RMA); regional banking schools such as the Barret School of Banking – Memphis, the Graduate School of Banking – Wisconsin, the Southwestern Graduate School of Banking – Dallas, the Graduate School of Banking at Colorado, and the Western States School of Banking; statebanking and community banking associations in a dozen states; and individual banks.

He is based in Huntsville, AL, and has owned/operated Advantage Consulting & Training for 12 years, after a 22-year banking career including senior positions in lending and credit, plus president of a community bank through formation, then acquisition of an existing bank. He has BS and MBA degrees from the University of Alabama, Tuscaloosa.

Key Topics

- What is construction risk?
- Types of construction situations: Full construction vs. repair/remodel
- Differences between residential and commercial construction loans
- Issues with construction contracts and budgets
- Residential
 - Additional due diligence, beyond a conventional mortgage application and underwriting, such as a detailed cost estimate (Description of Materials form)
 - Contractor credentials and financial strength
 - How is the construction loan going to end (get repaid)?
- Commercial
 - The interest reserve – a common provision, but not always automatic
 - Five items that determine how you handle a specific loan
 - The type of project (full construction vs. repair/remodel)
 - The loan approval and related conditions or contingencies
 - The commitment letter written to the customer
 - Your bank's policies and procedures
 - The construction-loan agreement
- Common documentation, including surveys and title insurance, plus surety bonds in commercial situations
- Common funding controls, including inspections, lien waivers and funds disbursement methods
- Dealing with cost overruns, delays and budget changes
- Completion of the project and (if applicable in commercial situations) release of the retainage, plus project stabilization
- Special issues with owner-occupied loans
